

Cutsforth™ EASYchange® Brush Holder Systems replace most OEM holders quickly and easily while improving safety, increasing reliability, and lowering maintenance costs

# EASYCHANGE®

## Brush Holder Systems

Cutsforth™ EASYchange® Brush Holders are the best-in-class replacement for your brush excitation systems. Over the last two decades, Cutsforth™ has replaced tens of thousands of OEM & other aftermarket carbon brush holders.

Cutsforth™ Brush Holders have been proven to be more effective at reducing or eliminating the common problems related to brush excitation such as: brush binding, photographing, arcing, carbon deposits and more.

Make online brush changes safer and easier during your next outage!

### ⚡ PRODUCT HIGHLIGHTS

- Replaces most OEM and other aftermarket holders with little modification to existing rigging
- Cutsforth™ supplies the same grade carbon brush you are currently using
- Replace the brush, inspect & clean the holder safely away from the unit
- Holder's quality materials & design reduces common maintenance problems
- Retrofits take 1-2 days on most units
- Safely change brushes online to reduce unnecessary, costly downtime
- Integrates with Cutsforth™ Brush Condition Monitoring System

Cutsforth™ Technicians come on-site to install and calibrate your new rigging and inspect other excitation conditions

### BRUSH MONITORING

Ask about our **EASYchange® Brush Condition Monitoring** that delivers key brush health data directly to your control room such as length, vibrations & more.

## ⚡ Key Benefits

### | ADDED SAFETY:

- Safe and easy brush changes

### | INCREASES MANPOWER EFFICIENCY:

- Shorter and less frequent inspections

### | BOOSTS RELIABILITY:

- Fewer forced shutdowns due to collector ring maintenance

### | QUICK AND EASY CLEANING

### | REDUCES COST OF MAINTENANCE:

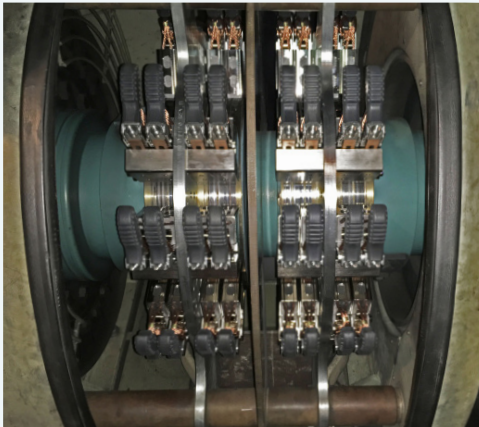

- Decreases need for truing and repairs from potential ring fires

### | LENGTHENS TIME BETWEEN MAINTENANCE

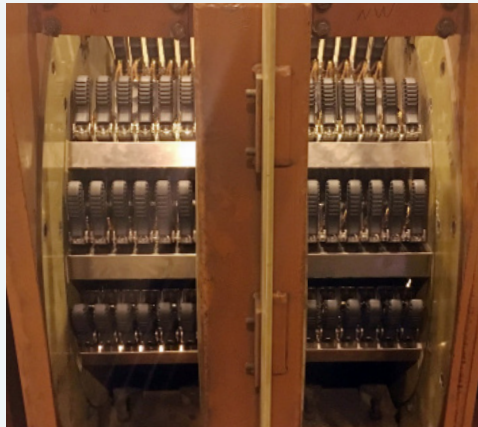

### | IMPROVES MAINTENANCE:

- Measures historical trends on: brush wear rate, temperature, and brush vibration
- Leads to more informed decisions from measured analytics
